Insulated Glove Inflator Tester Kit - Volt Safety

The Insulated Glove Inflator Tester Kit from Volt Safety is a portable device designed to perform air tests on insulated gloves and assist users during visual inspections by helping identify abrasions, cuts, tears, or punctures. This glove inflator is lightweight and easy to use anywhere. It includes a durable canvas storage bag and features a strap to securely hold electrical insulated gloves in place during testing.

SKU/Part #
GLOVE-INF-G99+ADP

Key Features:

- All gloves classes and sizes can be inflated - Class 00 to Class 4
- Class 00, Class 0 and Class 00-a Gloves require the adaptor to inflate the gloves
- Inflate and visually inspect electrical insulated gloves in the field
- Simple, easy-to-use, and portable
- The glove is secured to the inflator using a nylon strap and fastened with hook and loop fastener
- Glove inflation is accomplished by pumping the bellow of the inflator
- Suitable for all for Insulated glove brands
- Includes a Canvas Bag to contain all kit contents together

Standards:

- AS 60903:2022 (Complies with)
- AS/NZS 60903:2020 (Complies with)
- IEC 60903:2014 (Complies with)

***NB. The Glove Inflator is to be used to assist with the visual inspections of gloves. It does not replace the need for periodic Electrical Testing when required.**
