

Low Voltage Wall Mounted Rescue Kit - Volt Safety

Low Voltage Switchboard Wall Mounted Rescue Kit made by Volt Safety is a must-have kit for businesses that require a dedicated rescue kit on-site. The kit is mounted near the switchboard and designed to be used by the safety observer in the event of on-site electrocution. It enables the safety observer to safely perform rescue from a live LV switchboard panel without being electrocuted.

NB The insulated gloves supplied in this kit are required to come in size 11 to ensure the gloves can fit different safety observers. The gloves are stamped 'RESCUE USE ONLY' to state that they should *not* be used as everyday working gloves, as the gloves need to be suitable for purpose in the event that a rescue is required.

Key Features:

- Conforms to the requirements of Australian energy providers
- Ensures that there is always a Low Voltage Rescue kit available on-site
- Kit Size: 37cm width x 45cm height x 21cm depth
- Kit Weight: 8.75kg with all kit contents
- Brightly coloured box to ensure kit is easily findable in dark environments
- Straps inside the box to ensure contents stay in order
- Comes with 4 strong mounting bolts
