

- Keep your cool for hours with the Antarctictech[®] Phase Change Cooling Vest
- Constructed with a 100% cotton outer layer and polyester filling. Four internal pockets hold the phase change cooling blocks which maintain a constant temperature of 15°C for up to 2 hours.
- Phase change blocks can be refrozen and reused by placing them in the fridge or freezer.
- The cooling effect is NOT based on evaporation, so you don't have to contend with a damp vest and it works under protective coveralls allowing workers to stay cool and comfortable for longer.
- Vests are adjustable with an elasticated hook and loop closure on each side to get the perfect fit from MED to 3XL (One size fits most).

PRODUCT CODE	DESCRIPTION	BARCODE
ATCV-V	Vest Blue (One size fits most)	9420003504915
